User Guide & Maintenance Recommendations

Before cleaning with water, erase all writing with a felt brush to remove all chalk dust.

1. Use a gentle soap cleaner (such as dishwashing liquid) mixed with warm water to clean the surface.
2. Wet surface completely with soap and water mix to clean thoroughly.
3. Remove excess water with a squeegee.

Note: Never write on a wet board. Do not use oil or wax-based products to clean board surface.

Additional Details

Use a clean, soft cloth to clean the surface.

Recommended Maintenance Frequency

Once a week or more frequently according to use.

Recommended Cleaning Brush

3-coloured felt brush.

Recommended Chalks

Use semi-hard chalk made from a base of calcium and carbonate. They are dust-free and create strong, clean lines.

How to erase marks that remain visible?

1. Clean marks that remain visible with paint thinner.
2. Then clean the entire surface with water and a clean cloth.
